

Project Planning Phase

Milestone and Activity List

Date	11 November 2022
Team ID	PNT2022TMID26433
Project Name	AI Powered Nutritional Analyzer for Fitness Enthusiasts

Milestone:

Determining the nutritional content of the food plays a vital role in Analytical Chemistry which exposes the information about Processing, Quality Control and Food Contamination. The Primary Aim is to develop an application which characterizes colour, shape, texture and more. The user captures the image via the application and the application will analyse and detect the Nutrition from the provided image.

Activity List:

Project Management Planning is an important task to schedule the phrase of the project. In this, various activities are allotted and finished by the Team Members and the project consists of four phrases. They are

- Phrase 1: Collection of Information and Requirement Analysis.
- Phrase 2: Project planning and Execution.
- Phrase 3: Implementing the High Efficiency of Deep Learning Algorithm for better performance.
- Phrase 4: Deploying the application and Testing the application.
