Sprint Delivery Plan

Project Name	**AI Powered Nutrition Analyzer for Fitness Enthusiasts**
Team ID	**PNT2022TMID26433**
Date	**11-11-2022**

Sprint Delivery Plan:

In project, Sprint delivery planning is an essential process that an organization needs to adapt to be successful. It indicates the roadmap for the next two to four weeks when stakeholders and team members decide as a group what they need to complete and deliver before the next sprint review meeting. Sprint planning refers to a meeting that takes place before the start of a sprint. The team conducts this meeting to determine the sprint plan and set a sprint goal. The members decide on the number of backlog items in the sprint and sets up a sprint backlog and current sprint. Every single module is assigned to the team mates to showcase their work and contribution of developing the project.

DELIVERY PLAN
